Vol. 24 No. 1 January 2002

RESEARCH REPORTS

Exploring culture, language and the perception of the nature of science
Dawn Sutherland and Reg Dennick 1

An ecology of science education
Peter Aubusson 27

Studies of Portuguese and British primary pupils learning science through simple activities in the home
Maria de Lurdes Cardoso and Joan Solomon 47

Conceptions of teaching held by school science teachers in P.R. China: identification and cross-cultural comparisons
Lingbiao Gao and David A. Watkins 61

'Forms of Energy', an intermediary language on the road to thermodynamics? Part I
Wolter H. Kaper and Martin J. Goedhart 81

The object coordination class applied to wave pulses: analysing student reasoning in wave physics
Michael C. Wittmann 97

Vol. 24 No. 2 February 2002

RESEARCH REPORTS

'Forms of energy', an intermediary language on the road to thermodynamics? Part II
Wolter H. Kaper and Martin J. Goedhart 119

Balance of scientific literacy themes in science curricula: the case of Lebanon
Saouma BouJaoude 139

Three forms of assessment of prior knowledge, and improved performance following an enrichment programme, of English second language biology students within the context of a marine theme
Nicola F. Feltham and Colleen T. Downs 157

Algorithmic, LOCS and HOCS (chemistry) exam questions: performance and attitudes of college students
Uri Zoller 185

Students' perceptions of Roundhouse diagramming: a middle-school viewpoint
Robin E. Ward and James H. Wandersee 205

Vol. 24 No. 3 March 2002

SPECIAL ISSUE

The Science Teacher Training in an Information Society (STTIS) project

Guest Editor: Roser Pintó

Introduction to the Science Teacher Training in an Information Society (STTIS) project
Roser Pintó 227

Students' reading images in kinematics: the case of real-time graphs
Italo Testa, Gabriella Monroy and Elena Sassi 235

Analysis of science textbook pictures about energy and pupils' readings of them
Fani Stylianidou, Fiona Ormerod and Jon Ogborn 257

Students' reading of innovative images of energy at secondary school level
Jaume Ametller and Roser Pintó 285

Reading images in optics: students' difficulties and teachers' views
Philippe Colin, Françoise Chauvet and Laurence Viennot 313

Students' difficulties in reading images. Comparing results from four national research groups
Roser Pintó and Jaume Ametller 333

Vol. 24 No. 4 April 2002

RESEARCH REPORTS

Brain development, structuring of learning and science education: where are we now? A review of some recent research
Linda Hansen and Martin Monk 343

Students' understanding of the role of scientific models in learning science
David F. Treagust, Gail Chittleborough and Thapelo L. Mamiala 357

Modelling, teachers' views on the nature of modelling, and implications for the education of modellers
Rosária S. Justi and John K. Gilbert 369

A scientific creativity test for secondary school students
Weiping Hu and Philip Adey 389

Collaborating to enhance student reasoning: Frances' account of her reflections while teaching chemical equilibrium
Gregory P. Thomas and Campbell J. McRobbie 405

Facilitating conceptual change in students' understanding of electrochemistry
Mansoor Niaz 425

Vol. 24 No. 5 May 2002

RESEARCH REPORTS

An exploratory study on students' problem-solving ability in earth science
Chun-Yen Chang and Yu-Hua Weng 441

Using the history of science to promote students' problem-solving ability
Huann-shyang Lin, Jui-ying Hung and Su-chu Hung 453

Induction as an empirical problem: how students generalize during practical work
Per-Olof Wickman and Leif Östman 465

Television programming and advertisements: help or hindrance to effective science education?
Gabrielle McSharry and Sam Jones 487

The global, the local, and the science curriculum: a struggle for balance in Cyprus
Michalinos Zembylas 499

Student-generated questions: a meaningful aspect of learning in science
Christine Chin, David E. Brown and Bertram C. Bruce 521

Vol. 22 No. 6 June 2002

RESEARCH REPORTS

High school students' understanding of resistance in simple series electric circuits
Laurent Liégeois and Etienne Mullet 551

Introducing quantum mechanics in the upper secondary school: a study in Norway
Rolf V. Olsen 565

Struggling to understand abstract science topics: a Roundhouse diagram-based study
Robin E. Ward and James H. Wandersee 575

Using deductive reasoning to promote the change of students' conceptions about force and motion
Jongwon Park and Sooja Han 593

Emirates secondary school science teachers' perspectives on the nexus between modern science and arab culture
Abdullateef H. Haidar 611

Bugs, butterflies, and spiders: children's understandings about insects
Daniel P. Shepardson 627

Cognitive structure and the affective domain: on knowing and feeling in biology
Tressa L. Thompson and Joel J. Mintzes 645

Vol. 24 No. 7 July 2002

RESEARCH REPORTS

What sort of science education do we really need?
Sandra Duggan and Richard Gott 661

Ecological understanding 1: ways of experiencing photosynthesis
Britta Carlsson 681

Ecological understanding 2: transformation – a key to ecological understanding
Britta Carlsson 701

The meaning of student inquiry questions: a teacher's beliefs and responses
Charles J. Rop 717

Variation in learning orchestration in university biology courses
Elizabeth Hazel, Michael Prosser and Keith Trigwell 737

Making a map of science: general systems theory as a conceptual framework for tertiary science education
Sergei A. Gulyaev and Heather R. Stonyer 753

Vol. 24 No. 8 August 2002

RESEARCH REPORTS

Nested epistemologies: science teachers' beliefs of teaching, learning and science
C.-C. Tsai 771

Assessing explicit and tacit conceptions of the nature of science among preservice elementary teachers
J. A. Craven III, B. Hand and V. Prain 785

Computer simulations in the high school: students' cognitive stages, science process skills and academic achievement in microbiology
J. Huppert, S. M. Lomask and R. Lazarowitz 803

Does the man in the moon ever sleep? An analysis of student answers about simple astronomical events: a case study
J. Dove 823

New experiences and old knowledge: towards a model for the personal awareness of science and technology
S. Stocklmayer and J. K. Gilbert 835

Addressing children's alternative frameworks of the Moon's phases and eclipses
M. Barnett and J. Morran 859

Vol. 24 No. 9 September 2002

RESEARCH REPORTS

Teachers' implementation of gender-inclusive instructional strategies in single-sex and mixed-sex science classrooms
L. H. Parker and L. J. Rennie 881

Science education for empowerment and social change: a case study of a teacher educator in urban Pakistan
R. Zahur, A. C. Barton and B. R. Upadhyay 899

The correlates of the socio-cultural background of Botswana junior secondary school students with their attitudes towards and achievements in science
M. E. E. Kesamang and A. A. Taiwo 919

Reflections on African science education for the new millennium: the case of the Ethiopian chemistry curriculum for beginners
T. Engida 941

The impacts of a web-aided instructional simulation on science learning
Y.-S. Hsu and R. A. Thomas 955

Concepts of a higher hierarchical level require more dual situated learning events for conceptual change: a study of air pressure and buoyancy
H.-C. She 981

Vol. 24 No. 10 October 2002

RESEARCH REPORTS

A survey of the use of newspapers in science instruction by secondary teachers in Northern Ireland
R. Jarman and B. McClune 997

The development of an alternative in-service programme for Korean science teachers with an emphasis on science-technology-society
J. Cho 1021

Children's understanding of substances, Part 2: explaining chemical change
P. Johnson 1037

Framing curriculum discursively: theoretical perspectives on the experience of VCE physics
C. Hart 1055

Discourses about a teacher's self-initiated change in praxis: storylines of care and support
S. M. Ritchie and D. L. Rigano 1079

The parallelism between scientists' and students' resistance to new scientific ideas
J. M. Campanario 1095

Vol. 24 No. 11 November 2002

SPECIAL ISSUE
Perspectives on Environmental Education-related Research in Science Education
Guest Editors: Justin Dillon and William Scott

Editorial – perspectives on environmental education-related research in science education
J. Dillon and W. Scott 1111

Park visitors' understandings, values and beliefs related to their experience at Midway Geyser Basin, Yellowstone National Park, USA
M. Brody and W. Tomkiewicz 1119

Making biodiversity meaningful through environmental education
D. van Weelie and A. E. J. Wals 1143

The science and values that young people draw upon to make decisions about biological conservation issues
M. M. Grace and M. Ratcliffe 1157

Knowledge producers or knowledge consumers? Argumentation and decision making about environmental management
M.-P. Jiménez-Aleixandre and C. Pereiro-Muñoz 1171

Controversial environmental issues: a case study for the professional development of science teachers
C. Gayford 1191

Mutualism: a different agenda for environmental and science education
A. Gough 1201

Thinking/acting locally/globally: Western science and environmental education in a global knowledge economy
N. Gough 1217

Environment in the science curriculum: the politics of change in the Pan-Canadian science curriculum development process
P. Hart 1239

Vol. 24 No. 12 December 2002

RESEARCH REPORTS

Experienced teachers' knowledge of teaching and learning of models and modelling in science education
J. H. Van Driel and N. Verloop 1255

Science teachers' knowledge about and attitudes towards the use of models and modelling in learning science
R. S. Justi and J. K. Gilbert 1273

How primary trainee teachers perceive the development of their own scientific knowledge: links between confidence, content and competence
T. Shallcross, E. Spink, P. Stephenson and P. Warwick 1293

Open-ended problem solving in school chemistry: a preliminary investigation
N. Reid and M.-J. Yang 1313
